

Scappoose Middle School

Scappoose School District 2023 Proposed Bond Measure

Proposed Projects for Scappoose Middle School:

Replace Scappoose Middle School

The 92-year-old Scappoose Middle School building has failing infrastructure; is seismically unsound; lacks modern fire suppression systems; and does not adequately meet current educational standards with limited space for programs such as career and technical education, band, and choir.

If the proposed measure passes, the District will replace Scappoose Middle School with a new, safe school adjacent to the High School that meets today's safety and educational standards.

In addition, if the proposed measure passes it would fund expanded athletic facilities with a new middle school track, gymnasiums and football/soccer field; replacement of displaced JV baseball field; resurfaced turf baseball field and new turf softball field. In addition, the proposed bond, if passed, would fund lights on the turf baseball field and turf softball field.
